

19 January 1978

Mr. Clifford Vige
Program Management Group (Tomahawk)
Pacific Missile Test Center
Point Mugu, California

Dear Mr. Vige,

STATINTL

On 15 December 1977, [redacted] visited Point Mugu for an orientation tour. Mr. Rick Smith was their host for the afternoon.

STATINTL

The tour was very informative and our analysts picked up a considerable amount of useful background information and insight into what is required to successfully conduct a cruise missile test program. The professional treatment which was accorded our analysts was a large factor in making the tour worthwhile. I believe that the information gained through the discussions with Mr. Smith will be valuable to us in analyzing similar foreign programs.

Thank you very much for the time and effort expended by you and your staff in setting up and conducting our tour.

Sincerely,

STATINTL
